Welcome to the **360° Images for Schools** group! Please upload your spherical panoramics to your own Flickr account and add them to this group. Be sure to change your licensing to a **Creative Commons Attribution - NonCommercial - Share Alike license (CC BY-NC-SA)** and allow downloading!

This license allows others to remix, tweak, and build upon your work non-commercially as long they credit you and license their derivative works on the same terms.

The screenshot displays the istreetview.com website interface. On the left, a map shows the location of the Sydney Harbour Bridge in Sydney, New South Wales, Australia. A modal window titled "Load panorama from URL" is open, allowing users to load panoramas from three different sources:

- Load panorama from URL:** Enter a URL of Street View panorama from Google Maps. The input field contains the text "The copied URL, address goes here." and a "Load" button.
- Load panorama from Panorama ID:** Enter ID of a panorama. The input field contains the text "The Panorama ID goes here." and a "Load" button.
- Load panorama from Coordinates:** Enter latitude and longitude of a panorama. There are input fields for "Latitude" and "Longitude", a "Show on map" button, and a "Load" button.

On the right, a Street View panorama is displayed, showing a road with "TAM 38" painted on it. The interface includes a "Download thumbnail" button and a "Download 360°" button. The URL in the browser's address bar is <https://istreetview.com/BWv5y2A4KADFH92SY-dQ-g>. The browser's taskbar shows various open applications like YT D/L, XFINITY TV, and SmarterMail.
