Why animation

Types of animations

Google Slides

Why animation?

Grab the audience's attention

Tell a story

Give an inanimate object "life"

To "draw out" the content of the slide

Animating elements

The screenshot displays the Google Slides interface for a presentation titled "Animating elements". The "Insert" menu is open, showing the "Animation" option. The "Animations" panel on the right is active, showing a "Fade in" animation set to "On click" with a speed of "Fast". A blue box highlights the text "Test of animation" on the slide, with three blue arrows pointing from the "Animation" menu, the "Animations" panel, and the highlighted text.

AN ARTIST'S LOVE STORY

Transitioning slides

The screenshot shows the Google Slides interface for a presentation titled "04fishandchips.ppt". The top menu bar includes "File", "Edit", "View", "Insert", "Slide", "Format", "Arrange", "Tools", "Table", "Help", and "All changes saved in Drive". A toolbar below the menu contains various editing tools and tabs for "Background...", "Layout", "Theme...", and "Transition...".

The left sidebar displays three slide thumbnails, numbered 1, 2, and 3. Each thumbnail shows a black square with a border of white and blue circles and the text "FISH 'N' CHIPS" in yellow. Slide 1 is highlighted with a blue border.

The main preview area shows a large black square with a border of white and blue circles. The text "FISH 'N' CHIPS" is centered in yellow. The border consists of 10 white circles on each side, with blue circles interspersed at specific intervals: the top row has blue circles at the 3rd and 6th positions; the right side has blue circles at the 2nd and 7th positions; the bottom row has blue circles at the 2nd and 5th positions; and the left side has a blue circle at the 2nd position.

Creating the animation
